SKILLS

- Frontend Development:
React.js, HTML5, CSS3,
JavaScript (ES6+), Tailwind
CSS
- Backend & Programming:
Python, Node.js, Rust
(learning)
- Web Design: UI/UX
principles, Responsive
Layouts, Interactive
Interfaces
- Tools & Platforms: Git,
GitHub, VS Code, Netlify,
NPM
- Other Skills: Debugging, API
Integration, Version Control,
Deployment & Optimization

PROFILE

Enthusiastic junior software developer with hands-on experience building interactive web applications and developer portfolios. Proficient in React.js and Python, familiar with Node.js, and currently learning Rust to broaden backend systems knowledge. Passionate about web design, creating clean user interfaces, and shipping performant web apps.

WORK EXPERIENCE

ICT Attaché & Contractor
County Government of Samburu 2021–2022

- Spearheaded network infrastructure management and optimization across county offices.
- Designed and developed the official county government website, enhancing public access to services and information.
- Implemented network security protocols and system administration best practices.
- Transitioned from attaché to contractor role, demonstrating strong leadership and technical competence.

IT Intern
ICT Authority of Kenya 2022–2023

- Contributed to the National Optic Fibre Backbone Infrastructure (NOFBI) project to connect Kenya through high-speed fiber networks.
- Supported deployment and maintenance of national fiber-optic infrastructure, helping bridge the digital divide.
- Collaborated with technical teams on network planning, installation oversight, and quality assurance.
- Assisted in documentation, technical reporting, and stakeholder coordination for large-scale ICT projects.

Freelance Developer
Upwork (Remote) 2024–Present

- Delivering custom software solutions to international clients across diverse industries, specializing in full-stack web development and system architecture.
- Building scalable, production-ready applications using modern frameworks including React, Django, Node.js, and TypeScript.
- Managing end-to-end project lifecycles — from requirements gathering and technical design to deployment and ongoing maintenance.
